# NOVEL CORONAVIRUS COVID-19

## Personal Protective Equipment (PPE) According to Health Activities

**Remember: Hand hygiene is always important. Always clean your hand before putting on and after taking off your PPE**

### TRIAGING PATIENT

- Surgical Mask
- Gown
- Gloves

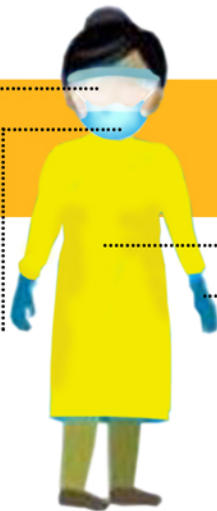

### COLLECTING RESPIRATORY SPECIMENS

- Goggles or Face Shield
- Fit Tested N95 Mask/ PAPR
- Gown
- Gloves
- Apron

### CARING FOR A SUSPECTED / CONFIRMED CASE OF COVID-19

- Goggles or Face Shield
- Surgical Mask

- Gown
- Gloves

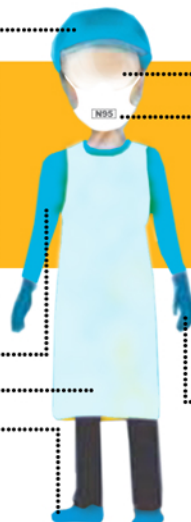

### TRANSPORT OF A SUSPECTED / CONFIRMED CASE OF COVID-19, INCLUDING DIRECT CARE

- Gloves
- Gown

- Goggles or Face Shield
- Surgical Mask

### PERFORMING AEROSOL GENERATING PROCEDURES (AGP) SUCH AS INTUBATION, EXTUBATION, BRONCHOSCOPY, INDUCTION OF SPUTUM AND CARDIOPULMONARY RESUSCITATION (CPR), OR CONSTANTLY COUGHING PATIENT

- Head Cover / Disposable Hood / Hijab
- Surgical Gown
- Apron
- Shoe Cover

- Goggles or Face Shield
- Fit Tested N95 Mask / PAPR
- Sterile Gloves

PPE must be done correctly in proper order before entry into the patient care area (hand hygiene, gown, mask or respirator, goggles or face shield then gloves). PPE must be removed slowly and deliberately before leaving the patient care area in the correct sequence to reduce the possibility of self-contamination (gloves, hand hygiene, goggles or face shield, gown then mask or respirator\* then hand hygiene). \*Remove respirator outside patient care area.
