SUBJECT: FAMILY MEDICINE DURING COVID-19 PANDEMIC

Kindly be aware that the COVID-19 Screening Clinic is operating from 8:00 a.m. - 7:00 p.m., seven (7) days a week for COVID-19 testing only. The COVID-19 Screening Clinic accepts patients referred from Infection Control "Patient tracing", Family Medicine, and Emergency Medicine Department (ER). Please note that patients referred from ER and Family Medicine are required to have a testing order in the system and an appointment order for Tele-clinic.

Further, please be informed that a new clinic under the name of **Family Medicine Flu Tele-clinic** has been launched as announced through [GD:769-41](#) dated 26 Shawwal 1441 (18 June 2020). This clinic is created to help patients who are presenting with mild flu symptoms (low grade fever, no chest pain or SOB). For further details about the Family Medicine Flu Tele-clinic, please refer to the mentioned GD.

Lastly, the Urgent Care Clinic is now converted to flu and non-flu tracking to help the current increase in number of patients with flu symptoms.

Thank you.

DR
